Saxo Bank | Q4 2019

BROWN ADVISORY AND SAXO BANK

The Ethical Selection Strategy: a bespoke partnership for Saxo Bank's clients

- Saxo Bank has partnered with Brown Advisory to create the **bespoke Ethical Selection Strategy**.
 - Saxo Bank has identified Brown Advisory's combined expertise in **rigorous, fundamental research and ESG analysis** of portfolio companies.
 - This led to the creation of a **customised 30-40 stock portfolio** for clients of Saxo Bank, which is well-positioned to generate **attractive outperformance** over time.
 - ESG analysis is inherently embedded into Brown Advisory's bottom-up research process to understand the **complete ESG risk profile** of a company.
 - **Specific screens** are also used to ensure companies that have any controversial business involvement are excluded from the Ethical Selection Strategy.
- **Brown Advisory's research philosophy:**
 - Deep, fundamental, proprietary research
 - Concentrated portfolios
 - Quality focus
 - Valuation sensitive
 - Long-term, patient investors
 - Integrated ESG analysis
 - Collaborative process

ETHICAL SELECTION STRATEGY

220

Multi-Step ESG Analysis Reduces the Universe

Negative Screens Further Refine ESG Profile

Multi-Factor Analysis

High Conviction Portfolio

Ongoing Portfolio Management

34

Typical Guidelines

No. of positions	30-40, maximum 40
Geography	Only securities domiciled in the U.S.
Position Size	0.25% - 6.5%
Cash	1% - 5%
Annual Turnover	10% - 35%
Active Share	No set target, but generally >75%
Benchmark	Russell 3000 Index

At every step of the process, our approach is governed by fundamental research and SRI screens.

AN INTEGRATED ESG PROCESS

ESG analysis is inherently embedded into our bottom-up, fundamental research process.

Our proprietary *ESG Risk Assessments* are completed on every company held in a portfolio or considered for ownership. This assessment identifies a company's material ESG risk factors, and the management of those risks, to understand the complete ESG risk profile of a company. We evaluate ESG controversies and proactively communicate any material ESG-related concerns to our team.

Our universe of fundamentally researched companies is ultimately tested against specific screens to ensure companies that have any controversial business involvement are excluded from this strategy.

- The Ethical Selection Strategy excludes companies that:
 - defy the United Nations Global Compact Principles (UNGC)
 - derive any of their revenues from controversial weapons
 - own fossil fuel reserves; are utilities that generate power from fossil fuels
- The Ethical Selection Strategy imposes limits on the following business activities to ensure that a company will not be included if it has:
 - more than 5% of its revenue derived from military equipment
 - more than 5% of its revenue derived from alcohol products
 - more than 5% of its revenue derived from tobacco products
 - more than 3% of its revenue generated from adult entertainment
 - more than 5% of its revenue generated from gambling

FORTIVE CORPORATION (FTV)

Fortive is a premier industrials company focused on instrumentation, transportation and automation technologies.

Fundamental Strengths

- Fortive spun-off from Danaher Corporation and possesses the same best-in-class operating culture and leadership.
- Opportunities for Fortive to expand and create value through M&A.
- The business has high margins and a strong growth profile.

Sustainability Drivers: Revenue Growth, Cost Improvement

- Gilbarco Veeder-Root helps retail gas stations comply with environmental regulations.
- Teletrac improves energy efficiency and safety through telematics for large fleets
- Sentra and Gems drive increased sensor content in factory automation.

An investor cannot invest directly into an index.

The Russell 3000® Index is a market capitalization weighted equity index maintained by the FTSE Russell that provides exposure to the entire U.S. stock market. The index tracks the performance of the 3,000 largest U.S.-traded stocks which represent about 98% of all U.S. incorporated equity securities.

Price-Earnings Ratio (P/E Ratio) is the ratio of the share of a company's stock compared to its per-share earnings. P/E calculations presented use FY2 earnings estimates; FY1 estimates refer to the next unreported fiscal year, and FY2 estimates refer to the fiscal year following FY1.

P/E / Growth Ratio, or PEG Ratio, is the ratio of a portfolio's P/E Ratio divided by its Est. 3-5 Yr. EPS Growth rate.

Active Share is a measure of the stock holdings in a portfolio that differ from the stated benchmark index.

All of the above ratios for a portfolio are expressed as a weighted average of the relevant ratios of each portfolio holding, EXCEPT for P/E ratios, which are expressed as a weighted harmonic average.

Portfolio Turnover is the ratio of the lesser of the portfolio's aggregate purchases or sales during a given period, divided by the average value of the portfolio during that period, calculated on a monthly basis. Portfolio turnover is provided for a three-year trailing period.
