| Mac | OSX 10.10+ | | | |

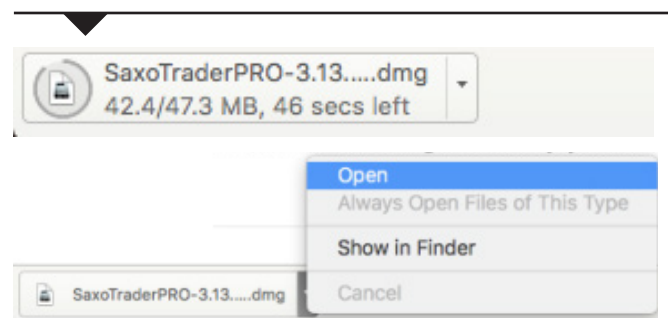

* Requires .Net 4.5

How to install SaxoTraderPRO on your Mac

Click on the "Download for Mac" link

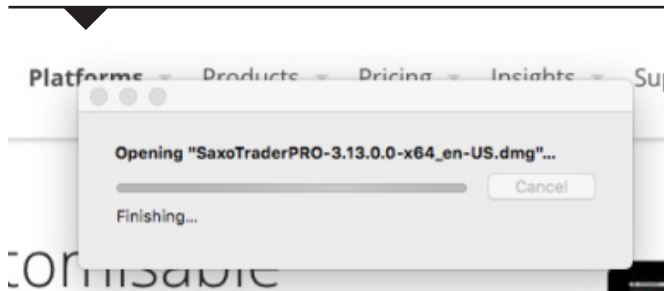

This will start the download process as seen in the **process bar** (The precise process depends on your default browser, in this example Safari is used)

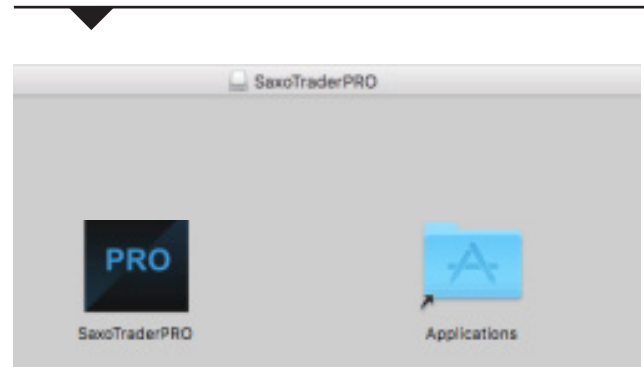

Click on the file when it has been downloaded and select "Open"

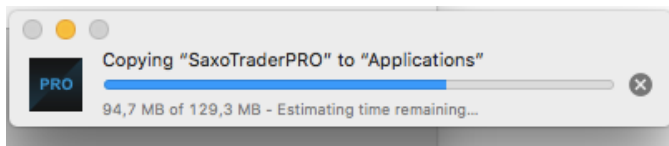

The file is now being opened

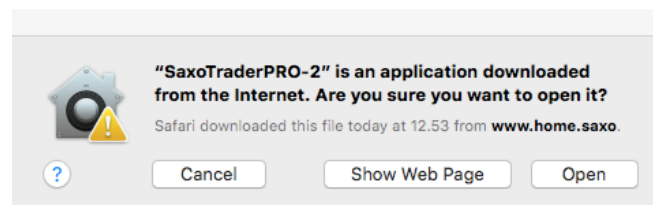

Drag the "SaxoTraderPRO" icon to the Applications folder

The file will be placed in the Applications folder

Depending on your security settings you may at some point see this dialogue. Click on "Open" to proceed

SaxoTraderPRO is now visible in the Applications folder. Double-click to open it

The login screen will load
