\* Requires .Net 4.5

## How to install SaxoTraderPRO on your PC

Click on the "Download for Windows" link

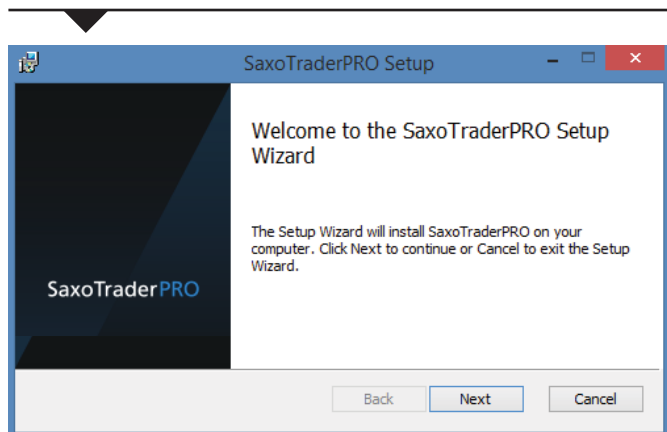

This will start the download process as seen here  
(The precise process depends on your default browser, in this example Google Chrome is used)

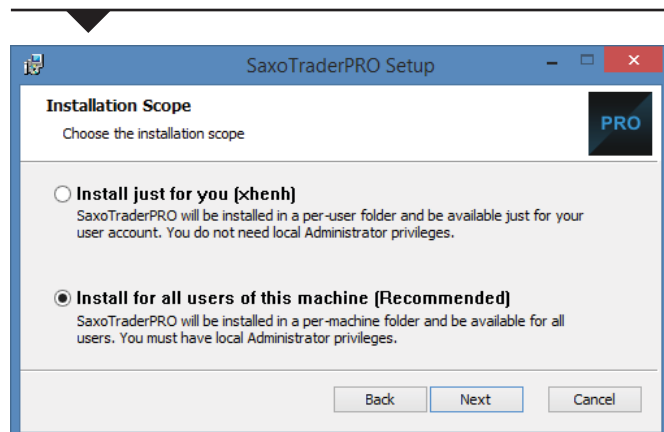

Click on the file when it has been downloaded

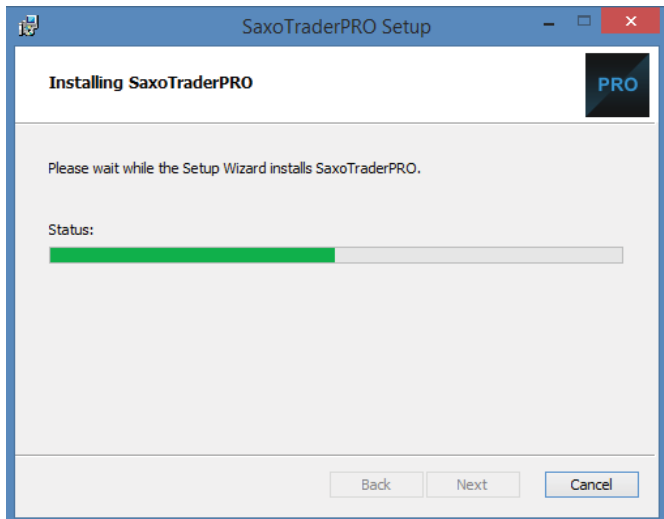

Opening the downloaded file will initiate the installation wizard

Select between a user installation  
(does not require admin rights) –  
and a all users installation  
(does require admin rights)

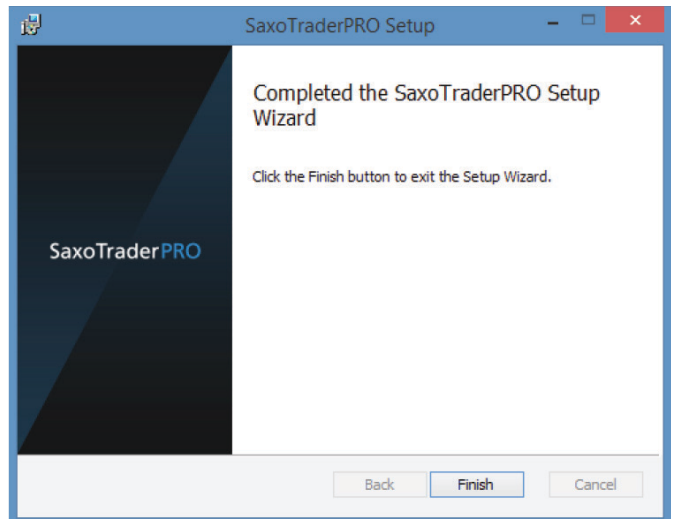

Click "Next" and the files will be installed

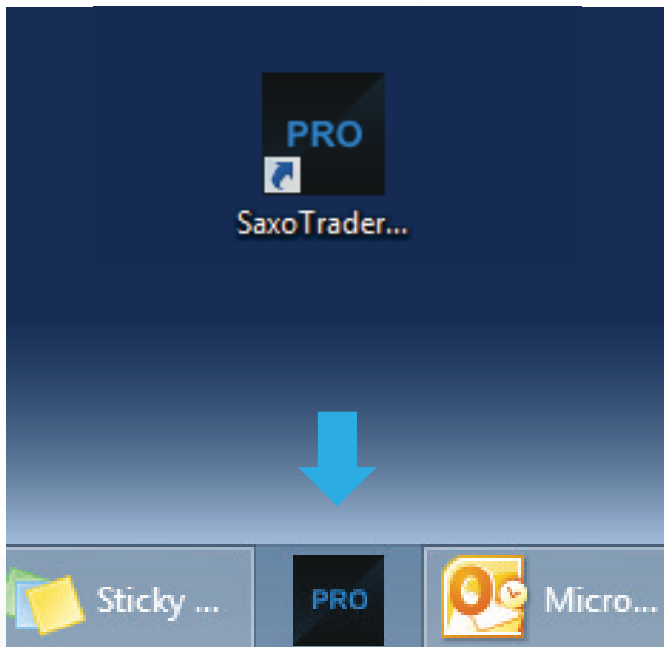

This completes the installation process.

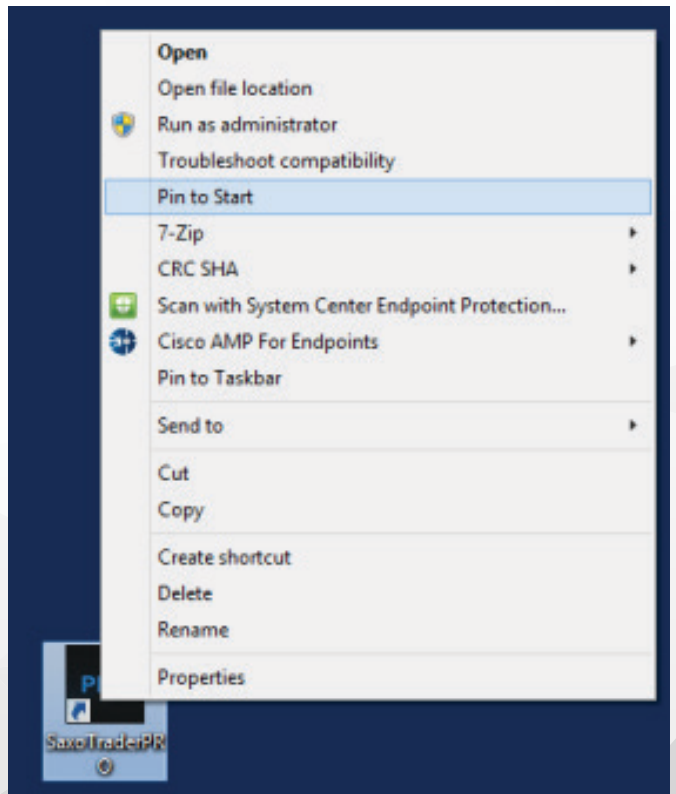

Click on "Finish" to close the wizard and start the application.

A desktop icon will be placed automatically.  
You can also drag and drop this icon to the task bar

Or right click to "Pin to Start" menu

Please note: In certain cases Anti-virus software may prevent you from installing and/or downloading SaxoTraderPRO correctly. If you experience issues, please consult your Anti-virus software and make sure to set SaxoTraderPRO as a trusted/allowed application.
